FOR IMMEDIATE RELEASE

CROWSON TECHNOLOGY'S NEW A300 (TES Stereo Power Amplifier) AUDIOPHILE STEREO MOTION EFFECTS NOW WITH IR CONTROL

Santa Barbara County CA, Sep, 2006/Crowson Technology, LLC -- Maker of the TES 100 (Tactile Effects System) proudly announces the release of the hotly anticipated **A300 TES Stereo Power Amplifier**.

Able to power up to four TES-100 Linear Actuators, the **A300 TES Stereo Power Amplifier** delivers audiophile-grade, remote-controllable performance for the world's most accurate low-frequency tactile effects. Watching a powerful stock car zoom from left to right across your display now means *FEELING* the ground-quaking engine, racing from left to right in your seat!

The A300 delivers effective bass management (3 channel input), gain control and a variable low-pass filter (20hz to 600Hz). The A300 is remote controllable via included remote or rear-mounted IR port

A300 (TES Stereo Power Amplifier):

- Powers up to four TES100 Transducers**
- Two channels 150W each RMS (6 ohm)**
- Rack mountable with optional ears**
- Remote controlled power and volume**
- Three inputs (Left, Right, LFE)**
- Variable Low Pass filter (20 - 600Hz)**
- Flat frequency response down to 2Hz**
- Ultra quiet variable speed fan**
- Signal sense auto on/off**
- Size: 2U (19" X 3.5" X 14")**
